

# Equipment Inspector Training

## Course description:

This comprehensive inspection course enables those responsible for the inspection of fall protection equipment to make educated decisions on the suitability for use.

The training will also include standards and regulations, incorporating what they require and how they relate to the inspection process. Upon completion, the student will receive a certificate acknowledging they have met or exceeded the requirements of the OSHA and ANSI standards.

## Duration:

0.5 days (up to 4 hours)

## Recommended attendance:

Employees who will be assigned a task to work at heights, issued fall protection equipment and required to inspect their equipment.
