

# 3M™ High-Strength Acrylic Adhesive 300LSE

## Description

3M™ High Strength Acrylic Adhesive 300LSE is an acrylic adhesive family designed to provide very high bond strength to most surfaces, including a wide variety of similar and dissimilar materials. This includes most plastics, metals, glass, papers and painted surfaces. It features good chemical, solvent, moisture and humidity resistance. This adhesive can perform at temperatures ranging up to 300°F/148°C.

## Attributes | Performance

- High initial bond strength to low surface energy substrates
- Good anti-lifting properties on flat and curved surfaces
- Double coated tape is easy to die-cut, handle and apply

### Solventless technology

3M™ High-Strength Acrylic Adhesive 300LSE is made with a solventless technology
