

# 3M™ VHB™ Extrudable Tape GP

## Description

3M™ VHB™ Extrudable Tape GP is a high strength pressure-sensitive adhesive that provides immediate handling strength, fast and easy application, and delivers the durability that customers require. This bonding solution, tailor-made for automation, reimagines tape, providing a faster, simplified, more sustainable solution for manufacturing processes. It provides excellent adhesion to many substrates – in some cases with little or no surface preparation – and has a stretch release feature that allows clean adhesive removal for rework of parts.

## Attributes | Performance

- Can be laid in variable widths, thicknesses and profiles
- Immediate handling strength
- Bond line can be closed immediately (hot) or after weeks (cold)
- Stretch release for reworkability and reduced scrap
- High strength pressure-sensitive adhesive
- Flows for gap-filling and attachment to non-planar/irregular surfaces
- Bonds and seals in one
