
3M™ Mini-Clamp Connector Series

Miniature IDC connectors for
sensors and other signal devices

Save space. Save waste. Save time.

3M™ Mini-Clamp Connectors are a family of wiremount plugs and sockets, common sockets, and boardmount sockets for a wide variety of industrial applications.

All 3M Mini-Clamp connectors for power, signal and network connectivity feature Insulation Displacement Contact (IDC) termination. Invented by 3M in 1961, IDC technology allows technicians to terminate multiple wires simultaneously without wire stripping for fast, reliable installation and maintenance in the field.

Easy, quick, reliable IDC termination.

Time and labor saving:

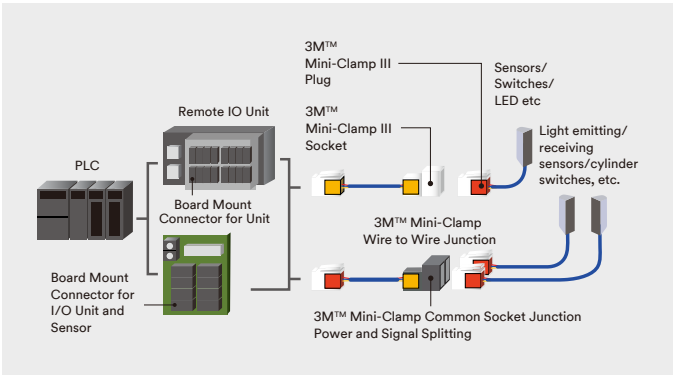

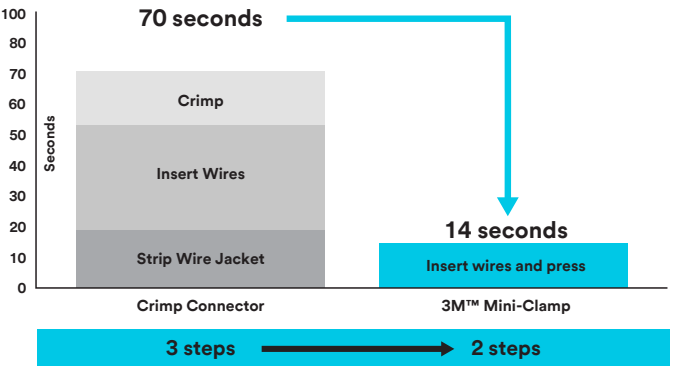

- No need to strip wires, no crimping required
- Terminate multiple wires simultaneously
- Reduces wiring time by approx. 80% compared to crimping connectors

37A0x-xxxx-W00 xx

- Quick and reliable Insulation Displacement Contact (IDC) termination without special tools
- No wire stripping – saves time, helps reduce risk of conductor damage and reduces waste
- Supports wire sizes 30-20 AWG
- Terminates 3 or 4 wires simultaneously in a single action
- Improved wire-holding mechanics provide stability during termination
- Easily connect to pig-tailed sensors and other devices
- Compact design with 2 mm pitch helps save space
- Transparent cover allows visual confirmation that wires are properly inserted
- UL and cUL recognized components, UL File No. E68080
